## **Holy House Shipping Environmental Objectives and Targets**

1. Achieving and maintaining compliance with all marine environmental protection requirements and the requirements of this ECP;
2. Training, educating and fostering among all shipboard and shore side personnel the need for solid environmental stewardship through a conscious effort at pollution prevention and accurate recordation of shipboard evolutions;
3. Environmental performance demonstrating continuous improvement in regulated and non-regulated areas;
4. Pollution prevention that emphasizes source reduction with respect to engine room, machinery space waste streams and effective management of cargo related wastes.
5. Sharing information with external stakeholders on environmental performance against all EMS objectives and targets.

Environmental Objectives and Targets were defined in 2010. The significant progress has been made in achieving those Objectives and Targets. We shall continue our efforts and keep all external stakeholders informed about to the progress by posting the updates on the Holy House Shipping website.
